## 90 Minute Fire Rated Positive Pressure Frames

August 10, 2016

Dear Distributor Partners,

Frameworks is pleased to announce an updated fire listing regarding rated door frames. Frameworks can now label door frames for 90 minutes, positive pressure with hose-stream for single frames up to 4'0" x 9'0" and pairs up to 8'0" x 9'0". Qualifying frames will have a minimum throat opening (or wall thickness) of 3-5/8". Full details can be found via Intertek SpecDIRECT using Spec ID #30249. Updated installation instructions are available online and will accompany product shipment. An updated Frameworks Fire Rating Chart is also available on Frameworks' website.

Please contact your Frameworks customer service representative or Door Security Solutions professional with any questions.
